## Market Sectors

With a large focus on manufacturing, adi Group supports the following market sectors.

## What our customers say...

““

I am pleased to have worked with the adi Group over the last few years. They are a very reliable supplier, trustworthy and provide a first class service. It's refreshing to do business with suppliers like this. It's good that the relationship is continuing to develop and to see our businesses working together to reduce costs, whilst maintaining safety, quality and sustainability performance.

““

The communication and ownership has been great and exactly the sort of service I was hoping for.

““

Please will you tell your management, that adi's site Engineers are brilliant. They always fill in the paper work required and always act in a very professional and polite manner.

““

Without yourselves we would not have achieved what we have to date.

““

Excellent, efficient and professional service as always.

““

Always going above and beyond which is much appreciated.

““

All works were completed as requested and can only be attributed to the flexibility, commitment and professionalism shown by the adi team.

## The adi Group

The adi Group is a large, multi-disciplined, privately owned engineering company offering a single source, integrated service to provide Totally Engineered Solutions.

With over 30 specialist in-house engineering divisions co-ordinated under one single source, adi Group delivers award winning, value engineering solutions tailored to your requirements. From construction through to operations and maintenance, we are the preferred engineering partner for many leading global brands and industry sectors.

Founded in 1990 with headquarters in Birmingham, the Group currently operates in twelve regional locations coordinating over 650 technical resources across the UK and Ireland. Our customers come from industries as diverse as aerospace, defence, food and beverage, automotive, general manufacturing, petrochemicals and pharmaceuticals.

Our specialist engineering services are called upon for more than 5,000 engineering projects a year varying in size, value and market sector. Customers turn to us to deliver bespoke solutions that result in lean practices with increased efficiency and reduced costs.

Having quadrupled in size between 2005 and 2015 (and on course to double in size again by 2020), our organic growth has been achieved by the recruitment of talented individuals combined with a unique understanding of our customers' businesses and challenges. The unique single-source structure of the Group allows us to self-deliver the majority of projects via our own highly skilled engineering teams without the need for additional resource from external contractors.

The Group is proudly accredited to EcoVadis, the first collaborative platform providing Supplier Sustainability Ratings for global supply chains, where it holds Gold Standard and is ranked within the Top 1% of more than 55,000 suppliers worldwide for its exemplary corporate social responsibility practices. The Group has also achieved Gold RoSPA standard for its ongoing commitment to health and safety practices.

With specialist knowledge across the engineering spectrum, adi Group is perfectly placed to be your engineering partner of choice – how can we help grow your business?

## Mission Statement

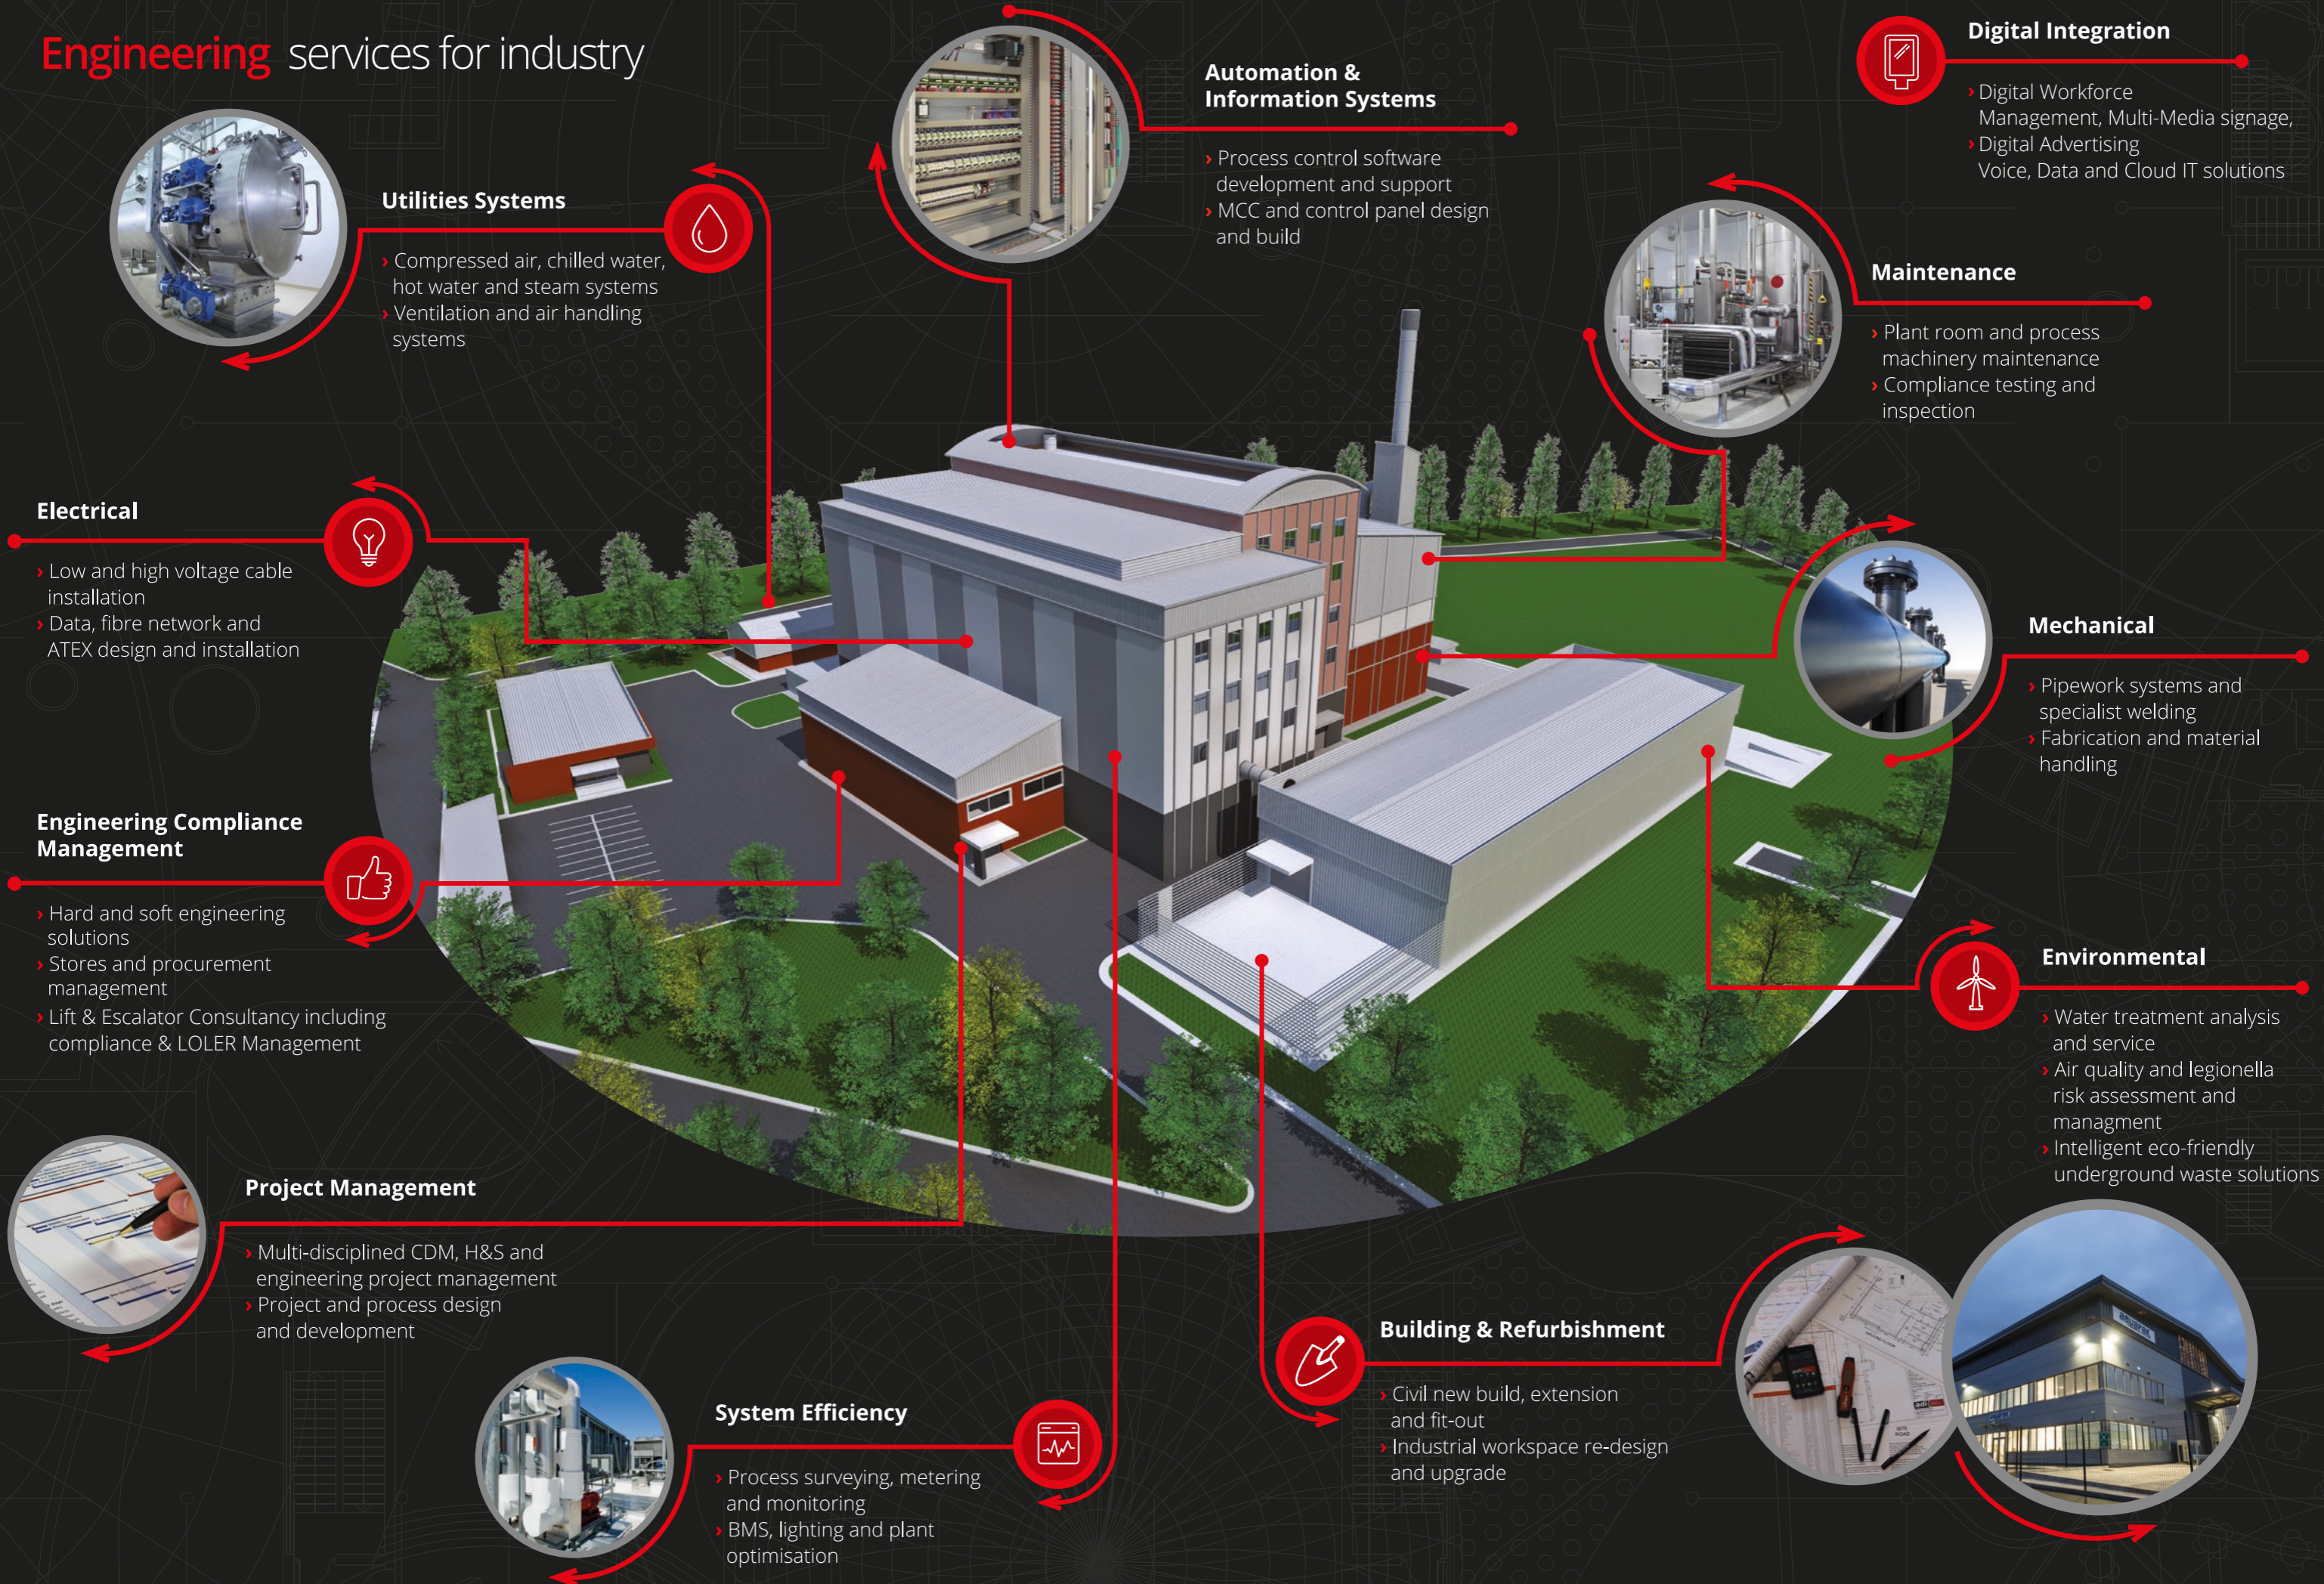

Our **purpose** is to grow a **profitable** group that adds **value** to our customer's business, maintains a **safe ethical working environment** and is an organisation that people **aspire** to work for.

““

The adi core growth strategy is continual investment in key personnel, infrastructure and customer development, delivering additional engineering services to meet clients needs.

# Engineering services for industry

## Utilities Systems

- › Compressed air, chilled water, hot water and steam systems
- › Ventilation and air handling systems

## Automation & Information Systems

- › Process control software development and support
- › MCC and control panel design and build

## Maintenance

- › Plant room and process machinery maintenance
- › Compliance testing and inspection

## Mechanical

- › Pipework systems and specialist welding
- › Fabrication and material handling

## Environmental

- › Water treatment analysis and service
- › Air quality and legionella risk assessment and management
- › Intelligent eco-friendly underground waste solutions

## Electrical

- › Low and high voltage cable installation
- › Data, fibre network and ATEX design and installation

## Engineering Compliance Management

- › Hard and soft engineering solutions
- › Stores and procurement management
- › Lift & Escalator Consultancy including compliance & LOLER Management

## Project Management

- › Multi-disciplined CDM, H&S and engineering project management
- › Project and process design and development

## System Efficiency

- › Process surveying, metering and monitoring
- › BMS, lighting and plant optimisation

## Building & Refurbishment

- › Civil new build, extension and fit-out
- › Industrial workspace re-design and upgrade
